

THE WORLD JUSTICE PROJECT: GENERAL POPULATION 2014 - OPINION POLL

Good morning. My name is _____. I am from _____, an independent polling organization. I do not represent the government or any political party. You are being asked to participate in a research study. The goal of the study is to understand the views of citizens in [COUNTRY] about people's experiences with the law. The study is being carried out by the World Justice Project.

You have been randomly selected to participate in this survey. This survey is completely voluntary and it will take about 30 minutes to complete. Your answers will be kept confidential. Your address will not be recorded. We will not ask for your name and nobody will ever be able to learn how you responded. Your answers will be put together with 1,000 other people we are talking to and we will never disclose your individual opinion. Rather, we will talk about national trends and patterns.

There are no wrong or right answers, our researchers value your opinions and want to know what you really think and feel about the topic being discussed. You can leave any questions unanswered, and you may stop the interviews at any time. There is no penalty for refusing to participate.

Do you wish to participate? ___ Yes ___ No [if "NO" study terminates]

The following questions describe hypothetical situations. In each question, I will provide you with a set of assumptions. Please select the single option that best represent your views.

1. Please assume that the government decides to build a major public works project in your neighborhood (such as a railway station or a highway), and assume the construction of this public works project requires the demolition of private homes in your community/neighborhood.

- a. **q1a.** How likely are these homeowners to be fairly compensated by the government?

- b. Now, assume that the monetary compensation offered by the government for the demolition of the houses is clearly unfair and inadequate. How likely are the following outcomes?

	Very likely	Likely	Unlikely	Very Unlikely	DNK	DNA
q1b_1. Homeowners would sue the government in court	1	2	3	4	9	0
q1b_2. Homeowners would revolt, barricade the roads and seek a solution by force	1	2	3	4	9	0
q1b_3. Homeowners would do nothing and resign themselves to losing the money	1	2	3	4	9	0

- c. **q1c.** Finally, if the homeowners sue the government, how likely is it that they obtain fair compensation in court?

2. **q2.** Please assume that one day the electricity-service-provider charges you a rate that exceeds the amount established in your contract. After complaining to the company, a company representative tells you that there had been a mistake, but assures you that the issue has been resolved. Still, in order to avoid disconnection, the representative advises you to pay the “wrong” amount and get a reimbursement of the overcharge, which you do. The next month, you receive another bill with the wrong higher rate, and no reimbursement for the previous overcharge. You file a complaint with the National Consumer Protection Agency. Which of the following outcomes is most likely? (**SINGLE ANSWER**) [**READ OUT OPTIONS**]

The company complies with the law, establishes your original rate, and refunds you the overpaid amount	1
The company establishes your original rate, but you don't receive any refund	2
Absolutely nothing happens	3

NOTE ON FRAMING DECILE INCOME QUESTION, CATEGORIES AND CARD

An income showcard should be devised with approximate weekly, monthly and annual amounts. You should use FIVE income range categories, each corresponding broadly to QUINTILES OF THE ACTUAL HOUSEHOLD INCOME RANGE in your country. These figures should be derived from the best available source for your country or from international sources. The data source used should match the requirement of the question i.e. quintiles of household income for all households (not for example average households or just households with children). The median should lie in the third quintile (Category C). The figures should not appear to be too exact. Minor rounding can be employed to achieve this if necessary. Please note that a showcard must always be used at this question. The five rows on the showcard should display the income ranges selected and be preceded by the five letters used above which helps to ensure respondent confidentiality. Each country can choose whether to include weekly, monthly or annual amounts on the showcard or include more than one of these as appropriate.
